

To whom it may concern, I feel that any attempt to stop the broadcasting of the weather or road conditions or any other broadcast that XM radio provides should not be allowed. I refer to petition 04-160. This type of thing should not be allowed, after all this is America where free enterprise is supposed to be allowed. Please don't take the informative channels that XM radio provides and I willfully pay for away just to help out their mainstream competitors. I ask that you at the FCC reject the NAB's petition. Thank you . DeAndrea Folster
